---

## Suggestions to revise your work.

- Do what the task asked.
- Review mathematical vocabulary
- Create a graph or chart that can get full credit.
- Use a ruler to draw lines.
- Define any variables you use.
- Label answers and use only standard notation.
- Eliminate run-on answers.
- Indicate which answer is correct.
- Work should support your answer(s).
- Write down the operations you entered in the calculator.
- Check computation.
- Use computations, calculations and mathematical language.
- Check answers for reasonableness.
- Use appropriate formulas.
- Use an appropriate strategy.
- Valid conclusions are based on the data or describe the data.
- Support your answer with words, numbers and/or diagrams.
- Stating your steps in words is not explaining.
- Restating the problem and/or directions is not explaining.
- Use mathematics in your explanations and justifications.
- Complete the task.
- Other
